I heard about Maria, she hated the rat race  
And she escaped to a beautiful place  
Birds of neo-paradise groove in the trees  
The name of her town is Tranquility

Protected by her mantra  
Following the formula  
In the sun thy will be done

Chasing her rainbows  
Talking with the animals  
Who say "You see, it's Tranquility"

Under shifting dimensions horizon returns  
Smoke in the distance as Babylon burns  
Summer in the river scattering the net  
Long to remember that hasn't happened yet

Protected by her mantra  
Following the orchestra  
In the sun thy will be done

Chasing her rainbows  
Talking with the animals  
Who say "You see, it's Tranquility"

Protected by her mantra  
Following the nebula  
In the sun thy will be done

Chasing her rainbows  
Talking with the animals  
Who say "You see, it's Tranquility"

Boys I've had enough  
There's no more smooth just rough  
Don't go looking for me  
Leave me  
In Tranquility
