

Pretty Things "Country Road"

Visit "[Country Road](#)" on MotoLyrics.com

Tired and warm, somebody near you
Tired and cold, someone far away
Turn your head, shadows are falling
Turn your head, see the new day

Country road it gets so hard
Many winters since I went away
Now I find myself behind the sun
You know we both went through it
If only we hadn't blew it

Tired and warm, somebody near you
Tired and cold, someone far away
Turn your head, shadows are falling
Turn your head, see the new day

Country mile it grows so hard
Grass seems taller since I went away
Now I find myself without that sun
You know we both went through it
If only we hadn't blew it

Tired and warm, somebody near you
Tired and cold, someone far away
Turn your head, shadows are falling
Turn your head, see the new day

Tired and warm, somebody near you
Tired and cold, someone far away
Turn your head, shadows are falling
Turn your head, see the new day
