She said, "You're a boy and I am a women"
And that was all she said
You love me and I need you
She put it in my head, in my head
She put it in my head

If you don't want it other people will
Hear me out, come walk in my heels
And then your free to argue
'Cuz you see this body is my ticket out
From needle park, junkie talk and sucker juice
You're living on sucker
If you don't want it other people will

(Other people)
Do it with our attitude
(Other people)
Do it till there heads are blue
(Other people)
I throw away all there guilt
(Other people)
But I ain't other people

I need to get to know you first
I need to get to know
I need to get to know you first
I need to get to know

I got a red dress yellow dress, black dress
I got a closet full of miracles
Pink panties, blue panties, yellow panties
I'm gonna wrap around your nose
A panty ho hose

I'll wrap around your nose ho hose
If you don't want it other people will

Do it with our attitude
(Other people)
Do it till there heads turn blue
(Other people)
I throw away all there guilt

(Other people)
Wait a second, wait a second

I need to get to know you first
I need to get to know
I need to get to know you first
I need to get to know

I need to get to know you first
I need to get to know
I need to get to know you first
I need to get to know

[Incomprehensible]
Lost years, your first touch
Midnight kiss, sold out
No [Incomprehensible]bloody tight

I need to get to know you first
I need to get to know
I need to get to know you first
I need to get to know

I need to get to know you first
I need to get to know
I need to get to know you first
I need to get to know
