Lights out in your room  
Lights out in your car (you gotta hit the ground running)  
Lights out in the streets where I walked  
To carry you home (and there's no way out)  
I know you fell asleep, pray you don't fall asleep where  
you are  
(now you're all alone)  
I know you were led by a dark hand

And I'll wait for the morning  
I'll trade in all the blood  
For everything that you are

What I found is the truth  
What I found is enough (you gotta keep on running)  
What I found in the room was my love  
All eaten up (and you're all alone)  
I know that you escaped, Cenobites sound the alarm  
(and there's no way out)  
I know you were led by a dark hand

Lights out in your room  
Lights out in the sky (you gotta hit the ground running)  
Lights out in the head that you wore  
As a disguise (and then you'll die alone)  
I know they took you back, spitting out chains from the  
wall (you know there's no way out)  
I know you were led by a dark hand
