Burn Apollo hear me sing  
I can do you anything  
Lights abrasion follows me  
Only if you disagree

Colossal planet free the sun  
All could ever do's been done  
My mind can't take this feeling too  
So I say I'll follow you

Please stop, waiting for the ocean  
Sun can only change it's motion  
You and I could run away  
Epic times we fall astray to peace

A Cloudless morning with the sun  
Reminds us all what we have done  
Destruction to our planet fast  
Has made it so these days won't last

Please stop, waiting for the ocean  
Sun can only change it's motion  
You and I could run away  
Epic times we fall astray to peace

And now concluding with our days  
I'm too nice to fall that way  
Follow me Apollo sun  
Show this world what we have done

Please stop, waiting for the ocean  
Sun can only change it's motion  
You and I could run away  
Epic times we fall astray to peace  
To peace my love  
To peace  
To peace my love
