Seems that I was wrong, Seems that things had turned around

The world I knew has changed, it's hard to hold
See you through the window and the lights they are so warm

Outside here it's getting much colder

But we've been running, for so long

Staring at satellites

Wonder if they can hear me now

Oh I need them so much right now

Want all their lights to fill me in

The streets lights are so dim it's so hard to move around

Want to shout for help, but I just can't make any sound

I have lost my feet, seems I'm falling all around

Become something that's hard to believe in

Cause we've been running, for so long

Oh I'm staring at satellites

And wonder if they can hear me now

Oh I need them so much right now

Want all their lights to fill me in

Just fill me in

Me in!

Hmm it's coming hmmm

Oh oh I'm staring at satellites

And wonder if they can hear me now

And I need them so much right now

Want all their lights to fill me in

Me in!

Staring at satellites

And wonder if they can hear me now

And I need them so much right now

Want all their lights to fill me in
