If you think that pro-choice is pro-child murder
Then what would you call woman dying
After trying to do an abortion by herself -
Is it suicide, or murder by our society?

I'm sure no-one would use it as a method of
Contraception.
There has to be a change to get it done.
You can't be seriously thinking
That making it illegal would end it completely...

To me it sounds much better
Doing them in safe
And hygienic conditions
Rather than by nonprofessional "doctor"
In some dark backroom.

By your strict abortion laws
You don't solve any problems
You just make them worse.
Think again, open your eyes -
You might be wrong.
