It's 2 am sneaking outside your window so keep it down low. We can fall in love tonight, we can make it last forever, with you in my passenger seat baby tell me can you feel my heart beat. Beat beat beat so fast, I want this night to last, so lets leave this town and never look back.

We can be young together, 17 forever.  
I can't breathe when you're loving me, this way.

We got drunk off champagne making our way back to the motel. You can put your hands on me, we can go all the way, and I just can't breathe when our lips meet. You got my heart racing just like we're in freshman year, It's like my first time all over again.

We can be young together, 17 forever.  
I can't breathe when you're loving me, this way.

Cause tonight nothing compares to your eyes not even the city lights.  
Don't turn the car back now we're almost out of this town.

We can be young together, 17 forever.  
I can't breathe when you're loving me, this way.

We can be young together, 17 forever.  
I can't breathe when you're loving me, this way.
