Concentrate, listen to me, while you do me
Should I surrender when you pursue me?
You think a man don't have heart and soul
When a hand's that good, anybody will fold

It's like poetry in motion
But the heart regulates the devotion
Love is floatin' in a sky blue ocean
Think about it

Feel the motion, young queen
It reminds me of a smoothed out movie scene
Two bodies intertwined on the screen
Everybody make love in their dreams, but this is real,
know I mean

Passion is the way of the world
Electricity when boy meets girl
And making love is the key
A burning flame that will last eternally

You should know that I'm here for you
As long as you see me through
I would give all I have just to be with you
Don't you see honey, it could be me and you

I really look forward to being with you
When you're not around I don't know what to do
You give me a feeling that I can't control
You take my heart and soul

Never question what I do
'Cause you need me baby and I need you
So there's no need for you to have no fears
Without a doubt I will be here

Now I know what I want to do
Everything's all right as long as I'm with you
Oh, don't you understand I don't want to be alone
Baby, don't you know?

I really look forward to being with you

When you're not around I don't know what to do
You give me a feeling that I can't control
You take my heart and soul

Never question what I do
'Cause you need me baby and I need you
So there's no need for you to have no fears
Without a doubt I will be here

Never question what I do
'Cause you need me baby and I need you
So there's no need for you to have no fears
Without a doubt I will be here

Never question, you should never question
'Cause you need me baby, yeah boy
So there's no need for you
Without a doubt I will be here

Never question what I do
'Cause you need me baby and I need you
So there's no need for you to have no fears
Without a doubt I will be here
