Anteroom for your love

Time goes by
All my friends skate away
Lost in their profession or their family
From rebels they've turned to cannibals
Eating themselves into hunger'd halls

And I'm lost
In an anteroom for your love

2001 in the early spring
I've got depressed by everything I've seen
Give me your medicine
Stop that state of mind

It's going on for such a long long time

And I'm lost
In an anteroom for your love

Scanning like a radar
Speeding like a train
Weeping like a coward
Won't you let me in
In my self made prison
I scream without noise
Emotional blackout
But I have no choice

I must stay
In an anteroom for your love
