(Remember, remember our heart)

Can't believe my eyes
Could it really be so
Drink it up buttercup, take it slow
And remember (remember) our heart

It's so weird to feel high
When a second ago I was feeling oh so low
And remember, remember your heart

Remember remember my heart
Now hey mama don't forget though we're apart
Hey mama take us from winter to summer
And remember, remember our heart
Now remember, remember your heart
Now hey mama don't forget though we're apart
Hey mama take us from winter to summer
And remember, remember our heart

It's so weird to say "bye"
When I don't wanna go
Got me feeling oh so low
I remember remember your heart

In a world so wide could it really be so?
Only one way to know
Remember remember our heart
Remember remember my heart
Now hey mama don't forget though we're apart
Hey mama take us from winter to summer
And remember, remember our heart
Now remember, remember your heart
Now hey mama don't forget though we're apart
Hey mama take us from winter to summer
And remember, remember our heart
