Mass extinctions, Global warning
We need DNA profiling
Anti-Government militia
Ecoli from baby kissing

Seatbelts, Seatbelts
Strangle me when I don't listen

Satellites are listening
An asteroid is gonna hit
The corporations steal your money
We all know that Bush is phony

Secrets, Secrets
I'll stay inside if it's code yellow

Another, Another
And I can't back down
I can't back down again

Another, Another
With my back to the wall
Yeah this is the call

Reaching to crawl out
Reaching to crawl out

S.O.S.
They wanna hear this
So fuck this

Spinning alley, big big brother
Families broken, struggling mothers
Terror plotting, Greenhouse gassing
Always looking for another

Defect, Defect
In my genes will make me get sick

Icecaps melting, children killing
Mass destruction, atom bombing

Homelessness rising, mad cow slaying
Think they stole my eyes for cloning

Star wars, star wars
They hunt us down with pinpoint lasers

Who are you afraid of?
Are you afraid of?
Who are you afraid of?
You! I'm afraid of!

Satellites are listening
An asteroid is gonna hit
Our president is full of shit
Our president is full of shit

Star wars, star wars
Making us call out, Making us call out

S.O.S.
