"Split Infinity"

Visit "[Split Infinity](#)" on MotoLyrics.com

We're making decisions,
We're taking advice
We're placing our bets,
It's a roll of the dice
We're clinging to something
That's never been there
We're stumbling through history
Without a care

But all we dream and say and touch and feel
Just shows our need to reach infinity
I wish there was a way
A chance to let us stay
I wish that we could split infinity

We're following orders,
We're breaking the rules
We're always believing
We've got nothing to lose
We're fighting each other,
We're looking for love
We're waiting for answers
From heaven above

Another life so fragile
Another golden beam turns into nothing
End it all today, take me far away
Out of this misery
