It's a faster, growing greed Flows through these leaves
I have, I try, I guess we'll be alright I do try, I don't know
why For you brought me better nights A beautiful, baby
blue Sky that's looking up at you Now watch it fade
away [Chorus:] But it's okay We'll come around When
nights like this are never ending I tried so hard to make
this perfect You and I somehow We can't see eye to eye
together We always knew that you were better I know
you want it all And you got me Sorry I never was
everything you ever dreamed But kept at bay, for just
in case that day [Chorus] I don't want you to love me
anymore With my bags packed, I'm ready to go But
nothing's ever hurt so much for me To let you go To let
you go My bags packed, I'm ready to go But nothing's
ever hurt so much for me To let you go To let you go
