"Ruins Of Ignorance"

Visit "Ruins Of Ignorance" on MotoLyrics.com

In this society we learn to live
We learn to read and to write
We learn to communicate
We learn to build our bombs
We learn to build our factories
We learn how to destroy ourselves

We've unlearned to feel
Forgotten how pain is like
We've unlearned to see
Forgotten what nature means
From the day of your birth
From the day of your birth
From the day of your birth

We've unlearned to love
Forgotten how to accept each other
[3x]

But we have to hold together
With intelligence and the strength inside of us
Fight together with values and not with weapons

The ruin of this planet
Set by the killing of animal and nature
People fuck dead corpses
And the pope gets furious about condoms
The world is made out of darkness and hate
Wealth and greed let evil rule
Wealth and greed let evil rule
Wealth and greed let evil rule
