"Parasol"

Visit "[Parasol](#)" on MotoLyrics.com

I feel a song coming up

Microbes digging trenches
Plankton hides from north sea to ganges

Got this urge to release some words from the
Hipper side of conscious
A population, filled rocket to another world
The government launches

Sing a message to you

Android suicide number immediately arises
Underground shelter furniture shop raises his prices

Yeah!

I feel some kind of song coming up goes
Something like ah-ah-ah yeah ah-ah-ah

I feel a song coming up
