

## Project Pitchfork "Resist"

Visit "[Resist](#)" on [MotoLyrics.com](https://MotoLyrics.com)

you controlled me  
long enough  
your sick instructions  
ruined enough  
computed dreams  
are not what I want  
we will end it  
here and now somehow  
all your wires  
in the heads  
you are a leader  
but you are dead  
in your cold brain  
you create the dread  
with your cold brain  
you make us mad  
cold strong visions  
get out of my head  
join the transition  
get out of my head  
humans against a machine  
minds against electricity  
hope against might  
blood against steel  
the sleeper awakes  
so be aware  
the tension is high  
everywhere  
cold strong visions  
get out of my head  
join the transition  
get out of my head
