searching gold you and me
just a reflection of insanity
digging for the wrong things
until we're old
like in the case of this fucking gold

we want to make the change
we're bored of the lies
but we can't 'cause they won't

they just close their eyes
they're not
chemical industry say

nothing can go wrong
they say it since forty years

and now we see the fact that it's too late

nature strikes back

the bury the garbage

of their magalomania

and the guardian angle
has choked himself
by tearing out his wings
he swallowed them
i'll enjoy getting lyrics and name of band of "in the year
2525"
