One Night Stand ringtone on your mobile phone  
Where you gonna go  
Where you gonna stay tonight  
You can't afford to be alone  
My car is parked right outside  
When the morning comes I'll give you a ride  
After this night of lust it's gonna be alright  
You're 12 beers deep  
Stumbling over you're feet  
It's so cold outside  
Aren't you glad, that I made you,  
Come into my bed as we quickly undress  
The Floppy Rods are bumping on my stereo  
It's 3 in the morning,  
The night is gone without warning  
I don't think I want this night to ever end  
We're going deep  
Feel a tingle in your feet  
It's so cold outside Yeah,  
Aren't you glad, that I made you, MINE?  
Our love is just skin deep  
I'm strapping shoes on my feet  
Gonna go outside  
Aren't you glad, that I made you mine?  
Where you gonna go when the morning comes around  
Are you going to leave before I awake  
You don't remember my name  
For me it's just the same  
And we were just another one night stand  
And we were just another one night stand
