"Mind Disease"

Visit "[Mind Disease](#)" on MotoLyrics.com

no god,nobody cares
the humanity,our regress
this whole shit,like a bad dream
illusions become your reality

change yourself like magnetic poles
live in a lie to wake up whole
deny your politics and your hate
Feed us with lies you build up our fate

Feel it! Before you start to ask!
Live it! Before you put your mask!
See how! much this shit can last!
Wake up! and smash them with a blast!

searchin to stop our brain
with an official game
they think they can change the rules
but we are here to refuse!

No need for one more step, the edge is here
Too late for antidotes, the disease is near
No one around is getting out alive
This time i don't find it
I've really lost my mind!

Madness! Confusion! Decay!
Madness! Confusion! Decay!

everybodyâ€™s looking for someone to blame
craving for money, abasing for fame
the weight of the world don't lie on your shoulders
It lies in the rope,they tie when it's over!
