Another day alone without you  
Another last regret  
Another hour that I can't forget you  
Another night alone without you  
There there

There's a place where I can't feel you  
You're just a memory  
And everything about you isn't real  
'Cause it's easier to dream  
That you're not there

Someday I'll be free  
Someday I'll be happy  
Someday I won't care

There  
Where the sun is gonna shine much brighter  
There  
Where the pain in my heart feels lighter  
There

Winter came right after Summer  
The leaves were on the ground  
Didn't notice that they'd turn to brown  
You and I  
Our time has come and gone

Someday I'll be free  
Someday I'll be happy  
Someday I won't care

There  
Where the sun is gonna shine much brighter  
There  
Where the pain in my heart feels lighter  
Someday I won't miss your kisses  
Or be thinking about the smell of your hair  
Maybe I'll turn around  
And suddenly find myself there  
How do I get there

From you

I built a magic world around you  
We were living in a special place and time  
I close my eyes and I still find you

There  
Where the sun is gonna shine much brighter  
There  
Where the pain in my heart feels lighter  
Someday I won't miss your kisses  
Or be thinking about the smell of your hair  
Maybe I'll turn around  
And suddenly find myself there  
How do I get there  
From you

There there
