Faded Paper Figures - Future Self

Almost every thought
fits neatly on this card;
I could believe you.
I could deceive you.
Driving in my car
Horizons in the dark;
This dissolution
is our resolution.
Our future selves are free
Your future self will love me.
Our future eyes will see.
Your future self will love me.
Your plans are on display,
You've got a fail-safe dossier;
Are you electric?
Are you a skeptic?
When we try to comply
with no thought for our lives
Are we courageous?
Or are we contagious?
