Don't try to hide
Get back in line
They'll always find ya
And if they do
When they do
It's all over
Then it's all over

Swallow the pride
You have to survive
Let go of the anger
So many have died
You have to abide
You must survive
Stay alive

My final string of hope was to listen to her
And I listened to her
I listened to her

A single ray of hope
I listened to her

Until that winter
Finally surrendered
The sun will rise
And melt the ice
Things will change

But all we've made
Will stay the same
And forever remembered
Forever remembered

She said wait
Things will change
But all we've made
Will stay the same
Forever remembered
