Island universe, baby you'll never get hurt
Something I could wait
Where we could live, forever, forever,
I can read your mind, the secret's not hard to find
Like the stars appear, perfectly aligned
Forever, forever,
Young and naïve,
Can we just make believe?
Die in our sleep,
Can we just make believe?

Island universe, baby you'll never get hurt
Something I could with
Where we could live, forever, forever,
I can read your mind, the secret's not hard to find
Like the stars appear, perfectly aligned
Forever, forever,
Young and naïve,
Can we just make believe?
Die in our sleep,
Can we just make believe?

Island universe, baby you'll never get hurt
Something I could with
Where we could live, forever, forever,
I can read your mind, the secret's not hard to find
Like the stars appear, perfectly aligned
Forever, forever,
Forever, forever,
Forever, forever.
