

Psychedelic Furs "All Of The Law"

Visit "[All Of The Law](#)" on MotoLyrics.com

When you're out in the crowd, tryin' to make it all pay
And we're tellin' the world
Everything that you said, every word that you say

And we're taking it down
Every word of it's true and you got to get free
Every shot that you take and you've got to get loose

And all of it's true, written in silver, it's only the blues
Written in new words and all of it's true
Written in silver, it's only the blues, written in new
words

We got all of the law and there's nothin' to prove
We got all of the dream, yeah, and all of it's free, we
got nothin' to lose
When your vanity fades, I know it's not you
And you got to get straight, every step that you take
And you got to get cool

And all of it's true, written in silver, it's only the blues
Written in new words and all of it's true
Written in silver, it's only the blues, written in new
words

Listen, we got it all, we're gonna make it all pay
We got all of the dream and we're telling the world
every word that you say
And we're taking it down, every word of it's true, yeah,
you got to get free
Every step that you take and you've got to get loose

And all of it's true, it's written in silver, it's only the
blues
Written in new words and all of it's true
Written in silver, it's only the blues, written in new
words
