Do you remember
All those long walks in the summer
When we only had each other to lose? I do
Do you remember
Cold nights in December
When I'd lay so close together with who? I do, it's you

You know you drive me crazy
You think you've got me figured out
One more time you'll start moving
To a beat that plays so loud

And what I should have said
I guess I never did
I didn't mean to hurt you

Do you remember
All those long walks in the summer
When we only had each other to lose? I do
Do you remember
Cold nights in December
When I'd lay so close together with who? I do, it's you

And now when I'm with you
I don't know what to do
Just when I get the part
I always break your heart

And what I should have said
I guess I never did
I didn't mean to hurt you

Do you remember
All those long walks in the summer
When we only had each other to lose? I do
Do you remember
Cold nights in December
When I'd lay so close together with who? I do, it's you
