Watch me ruin everything

If fate has disappointed you
If everyone's an invalid
If danger died and you withdrew
If every night you sulk in bed

Rotten faces glare
Judging our affair
If all you know is hollow
Step inside entropy's sideshow

If you are sick of standing still
If children thwart your filthy mind
If safety makes you want to kill
If you were shattered and maligned

None of them aware
They're not even there
If all you know is hollow
Step inside entropy's sideshow

Kneeling on the ground
Grinning when we heard this sound

If all you know is hollow
Step inside entropy's sideshow
If all you know is hollow
Fuckin' sorrow
Step inside entropy's sideshow
