"Automatic"

Visit "[Automatic](#)" on MotoLyrics.com

The trip is on for a million miles, 93 to the sun
Take your place and you say goodbye,
Its automatic you're the one,

Its automatic, its automatic
Its automatic you're the one
Its automatic, its automatic
Your day alive has just begun

Whats in the air, who's in the mind
Where's the light in your eye,
Within the realm of the possible, it's no big surprise

Its automatic, its automatic
Its automatic you're the one
Its automatic, its automatic
Your day alive has just begun

Brilliant sheep lead to brilliant babies,
A thousand stars, a million maybes
Captivating the captivated,
And save the souls of those that you created

Its automatic, its automatic
Its automatic you're the one
Its automatic, its automatic
Your day alive has just begun
Its automatic, its automatic
Its automatic you're the one
Its automatic, its automatic
Your day alive has just begun

(Yelled)
Its automatic, its automatic
Its automatic you're the one
Its automatic, its automatic
Your day alive has just begun
