Like I told you
I was going to I came and rescued you
Some overdosed soporifics mixed with your favorite
drinks

Sleep please sleep
While I steal a car and drive fast through the streets
Why should I be afraid
As long as you sleep on the backseat all tied up
I've never loved you more

Handcuffs ball gag and a blindfold for my valentine
Deaf wake up please wake up
We are heading for the end
Mute let it end

While I steel a car and drive fast away from here along
The interstate
Blind leave behind this dreadful hell hole
I have never loved you more
Passenger
Wake up wake up
We are heading for the end
We finally become on
