"Insects Destroy"

Visit "[Insects Destroy](#)" on MotoLyrics.com

I'm looking for a friend today
Another victim just like me
A lunatic a loser a freak
Another casualty from a fucked up society
I gave my all to the system
Half my life still in question
All about the money and power
All the greed they've devoured
You never gave any credibility for a vision given to the
enemy
And on the faces of humanity
A stone's eye throw for a man
On a pedestal
You sold your soul to the man
Another deal a deal gone bad
Another seed that never gets planted
Corporate insects destroy our planet
Never going to let another day die
My friend you and I
Feel the heat from the fire outside
Burning hot still alive
I keep it bottled inside me
You keep it bottled inside you
See the sun drop colours of red
Broken bones for a mouth well fed
Bring back a real train of thought
Another tool for the melting pot
