"Dead Roads"

Visit "[Dead Roads](#)" on MotoLyrics.com

The daylight has begun
And details are deleting
The words from microphones
Are falling all around us
No one can hear the sound
Our hearts are all repeating
The choruses were formed
To colorize the static

Dead roads, red lights
Dead ends in sight

The morning has begun
And warning signs are singing
The words inside the songs
Are crawling all around us
No one can hear the sounds
Our hearts are all receiving
The choruses record
The plots on the planet

Dead roads, red lights
Dead ends inside

All the sights
All the sounds
On the better part of town
All the lights in the skies
In the middle of the night
All the ghosts in the ground
And the devils in our mouths
In the dark
In the stars
In the middle of our hearts
