Now we get the ride fast  
Something like a line of hash  
Dipping city then bash  
Dash on the numeral  
Splash in the no sex  
Cuffing getting deeper breast  
I love making music  
And I love having fucking sex  
The flex on how I wanna overate you  
Debate you  
And rate you  
The state too  
The feeling that I'm about to have for you  
I like other shit as good as I like sex  
But some shit just don't come text  
The infered of sex  
The infered complex  
I love fucking sex

The mild attitude  
And that's really never what you showed a dude  
I'm getting real rude - my mind is fucking nude  
I wanna fuck you - and I like your attitude  
You can keep me in the mood- like kicking it  
When I don't miss some shit  
Guess what I don't miss you bitch  
The whole round of the filth - catch me landed sipping  
tint  
The shit that I hid - slid pay the fucking bid  
Watch the actually - right then there after me  
You running from your self

You running from your muthafucking house faculty  
Maxing on the stacks actually  
You can't even see reality  
The floss and the temperature  
You bitching trying to bring her  
The rounds on the mattress  
Playing video game's in my bed room  
On my couches  
In my living room

It's what that I consume  
You feel the whole room  
I'm not changing boom  
And what I believe - goes on everyday in the world for  
some  
I'm too way dumb - and the notes that you sipped  
You crying like a bitch

The "afther" watching the body notching  
The cool composite- and you still be what you wanted  
To be in your spirit you muthafucking demons near me  
Guess what fuck you and now that I choose too let  
women blew  
-you found out too the - end of my choices  
You speaking hearing voices the way we leave this  
And then make it like a chain forces  
We changed course- I coherst the game with nothing  
Open up your legs and get something girl  
I wanna fuck you  
It's a must too trust you
