Featuring Sway & P Money

(Intro)

In a time of the fallen lore  
Only two powers governed the land  
Good and evil

(Verse)

Oozing knives, super swab  
But I see my mack black soaked up, super cut  
Ever see that I'm ruthless and this one is a smash hit,  
bubble straight through the glass  
They ain't touchin me 'cause I ain't never runnin  
Sickened to my name and category, I ain't number onin  
Worst case scenario, is it won't be a target  
The message stood a happy ending, I'm coming  
Come in and stop spraying through a keyhole  
Wanna see me win this fight against evil  
The tarots are only preying on the weak  
I'll have em on their knees in the long hall, cathedral  
Yea, my head and mind drugged  
They're blowing it all the time but never when I flop  
Sway fever, but it's like hay fever  
Eyes are wide open whenever I drop

(Chorus)

I'm a savior here to save you  
I'm a problem too, frustrating you  
I'm all night here to contain you  
I'm the part that's still in plain view

(Interlude)

For every action there is an equal and opposite  
reaction

(Verse)

Oh shut up, I'll introduce myself  
I'm flowing like a pitbull  
I've the nark, its pung flying as a fistful  
I'm the shore where the kids wanna watch  
I've got the power to make them stay up late and miss

school  
Girls are like ah, in school  
Confusing nothing about me, simple  
I'm a bad motherâ€¦ shut your mouth  
I'd trust the girls and give all the pretty ones raincoats  
I'm so great, flying around with no cape, I'm so baked  
I graffiti my name on sky scrapers  
Heroes tell me to stop, I'm like shut up, gon hate  
I use my power for entertainment  
Some of mind the way I gave a you're an orgasm in  
home base  
Why you gotta take my dog? Get your own date  
Why you're here in my galaxy? Get your own place

(I'm a savior here to save you  
I'm a problem too, frustrating you)

(Chorus x3)  
I'm a savior here to save you  
I'm a problem too, frustrating you  
I'm all night here to contain you  
I'm the part that's still in plain view
