"Burning Flag"

Visit "[Burning Flag](#)" on MotoLyrics.com

My parents say - they still recall the day
The government assassinated jfk
The day the truth died - the bigger the lie
The easier they'll get that sucka by
Now in 01 - new millennium
They've gone and got themselves an even bigger one
Fight for justice - against the terrorist
Comin' down hard with the full weight of god's fist

And we ask the wrong question
And we still haven't learnt a thing
And we count down from ten
And the flags burn again

The world mourns - 4000 gone
What went down was insane, no question
Families torn apart - left with broken hearts
Welcome to the world of a middle-east dissident
Iraq, japan - korea, vietnam
Suffered this and worse at western hands
Supplyin' US arms, droppin' US bombs
Fueled the fire that's now burnin' up the pentagon

If you're not with us you're against us
If you're not with us you'll taste our justice
If you're not with us you're a target
If you're not with us we'll teach you a lesson
You won't soon forget

Ground zero - tribute to the heroes
Turn it all into one big tv show
Justice infinite - is a ratings hit
24/7 don't miss a bit
Don't miss a bit - don't miss a hit - don't give a shit
