"Throw Down"

Visit "[Throw Down](#)" on MotoLyrics.com

This is how we do no sights and no sounds time to
shake it up and then poor it down the hatch and then
we crash and burn my place I'm crazed they're faced
it's all uphill from here breath in deep do you see yea
they're looking a little sick to me let me get that three
two one let me hear you sing it loud cause this is our
night and this is our town here's what to do when you
hear the words throw down get fucked up don't
remember why you did what you did with her last night
pass out when you hit the ground here's what to do
when you hear the words throw down we'll make to the
hall of fame for this one dropping dimes feeling great
feeling strong cause it's packed that's a flash I guess
they're here run run run run through the woods to the
streets eventually they'll leave cause I wont let them
take this from me breath in deep do you see yea
they're looking a little sick to me let me get that three
two one let me hear you sing it loud cause this is our
night and this is our town here's what to do when you
hear the words throw down get fucked up don't
remember why you did what you did with her last night
pass out when you hit the ground here's what to do
when you hear the words throw down this isn't what we
want it isn't what we need it's time to throw it down like
you've never seen they say life is sweet I'd say I agree
don't even try and steal this night from me breath in
deep do you see yea they're looking a little sick to me
let me get that three two one let me hear you sing it
loud cause this is our night and this is our town here's
what to do when you hear the words throw down get
fucked up don't remember why you did what you did
with her last night pass out when you hit the ground
here's what to do when you hear the words throw down
