Can't let you say goodbye  
Can't let you go  
We've come so far together  
There's love, you know

I've been here riding along with you  
Eyes closed train rolling along with you

Coffee and magazines  
Coach station light  
Cashier calls out for me  
You're nowhere in sight

I've been here riding along with you  
Eyes closed train rolling along with you

Take your hand  
Look away  
Promises another day  
I wish I had the chance to say  
"please marry me."

The stars are in the sky tonight  
With you they shine so bright
