Thought I'd take a trip down to the old world  
'cause I heard a lot of things about the North American  
girls

I was looking for a lady  
someone to have my baby

So I got me on a 747 Pan-American plane  
I sat me down next to your all-American dame  
Said I'm going up north  
she said it's a pity  
Then she told about the gold  
down in Mexico City

Oh she said "Lordy Lordy  
watch the blue smoke flying  
every morning and every night  
to get you out of your head  
Oh man oh Lordy Lordy it's a natural high  
when you're living down south  
and it's going right out of your head

Got off the plane went to the customs  
and they gave me a list  
Do you carry a gun take drugs or are you Communist  
They said my papers were in order  
I wasn't staying long no sir  
I'm going south across the border

chorus

Took the first southbound  
across the Rio and down  
Found a little place in the small Mexico town  
Just me and my lady  
now she's having my baby

chorus x2
