Cold; shaking cold
Bought the seas
Torn eyes faints before me
If this fire, kills us all
Will you come before me
My eyes hate the roof of your blue nest
Facing how
My eyes hate the roof of your blue nest
Besides your burning wings
(Mumu)
Enclosed in feathers
A weak search with a strong will
A collective aim
Trying to natch the stain
A flight above reality Riding on our own wings
The skies fall
And we are to blame
Holding hands in the face of change
We're all the same
We're all the same
Tear us with your lies
Show us that your burning wings are fake
Now we burn this valley cos' we're you
Tear us! Tear us
My eyes hate the roof of your blue nest
Facing how
My eyes hate the rood of your blue nest
Besides your burning wings
