Back buried in a laboratory
P.O.W.s that can't tell their stories
Blood replaced with saline
Nerves pushed too far to offer any feeling

No one's gonna save you
You're only gonna die
No one's gonna save you
You're only gonna die

All governments always knew
Secrets traded for human life
Vile men with odd experiments
Killing off all their patients

No one's gonna save you
You're only gonna die
No one's gonna save you
You're only gonna die
