### "I Wave"

Visit "[I Wave](#)" on MotoLyrics.com

Holding myself down beneath the snow  
Dying in cold down beneath the snow  
Laying in white and oppressed by white

I wave goodbye

Trying to find what is left of me  
Tapping your boots right above my head  
Just leave

The eggs have cracked upon the stairs  
They have become more than I can stand  
Hiding in shame  
For the last time  
Black ray of light

And the cloud has come to pick me up  
But I won't go  
This frozen mud is where I want to stay  
And will

Hey hoot hey hoot

I wave goodbye

Just leave

Holding my breath down beneath the ice  
Wishing for death down beneath the ice  
Laying in white and oppressed by white

I wave goodbye, goodbye
