"Then The Music Stopped"

Visit "[Then The Music Stopped](#)" on MotoLyrics.com

Then the music stop,all the lights went out
Someone is crying now a time ago
For a moment we wished reality wasn't mend to be
hurting so
A falling star music and candlelight
You know where they are so darling lead me through
the night
When the music stopped ,we just walked away
into every day people go
cloudy summer nights, dying city lights ,now I know
that I need you so

Please stay by me cause I can still feel the falling rain
I wanna be loved by you and the music starts again

A falling star music and candlelight
You know where they are, so darling lead me through
the night
When the music stopped ,we just walked away
into every day people go
cloudy summer nights dying ,city lights, now I know
that I need you so
Please stay by me cause I can still feel the falling rain
I wanna be loved by you and the music starts again

Come along with me I wanna be loved by you and the
music starts again
Come along with me I wanna be loved by you and the
music starts again
