I love you when the sun breaks over the sea  
I love you when I open my eyes and you're looking at  
me  
I love you when you show me the way it can be  
How I love the way you love me

Sun comes up and the sun goes down  
You're the star I'm spinning around  
I was lost but I got found  
That's why I love the way you love me

Darkness fell but you turned on the light  
Coming out of the shadows you were burning bright  
I went wrong but you made me right  
That's why I love the way you love me

The road is long, the water is wide  
It's a long way across the great divide  
Whatever the way we're side by side  
That's why I love the way you love me

I love you when the sun breaks over the sea  
I love you when I open my eyes and you're looking at  
me  
I love you when you show me the way it can be  
How I love the way you love me
