Aye

Somebody bout to have a baby to this one, yeah  
I think you, I think you need to go and grab your baby  
ohh

See I want to love you in every way, touch you caress  
you let you do the same.  
If I don't do it the way that you like, then please let  
me know ooh ooh  
Girl I guarantee that your only complaint will be when  
I'm not around to do it again  
So if your a freak, baby don't be ashamed you  
gotta let it show ooh ooh girl

Look at the way you, look at the way your calling out my  
name  
and I'm loving the way you, loving the way your  
taking it from me.  
I'm holding your hips  
You biting your lips  
you pulling me closer, turning you over  
kissing on me telling me to go deep and then I hear  
you scream

Yes (yes) Yes (yes) this is how its supposed to be  
Got you screaming yes (yes) yes (yes) baby give you all  
of me.  
Oh now take it its yours, take it its yours, take it its  
yours  
be careful what you ask for you screaming yes (yes)  
yes (yes) sing it like a melody.

Oh yeah

When your legs get to shaking I know what time it is  
so I savior the moment and seal it with the kiss  
I want you to get yours before I get mine  
So you gotta let me know oh oh

As soon as we finish we hop up in the tub  
your body is like a bad habit

can never get enough  
We back at it like some animals

Now I'm ripping, stripping off all your clothes  
Look at the way you, Look at the way you, calling out  
my name  
Loving the way you, Loving the way you taking it from  
me  
I'm holding your hips  
You biting your lips  
you pulling me closer, turning you over  
kissing on me telling me to go deep and then I hear  
you scream

Yes (yes) Yes (yes) this is how its supposed to be (this  
is how its supposed to be)  
Got you screaming yes (yes) yes (yes) baby give you all  
of me.  
Oh now take it its yours, take it its yours, take it its  
yours  
Be careful what you ask for you screaming yes (yes)  
yes (yes) sing it like a melody

Bring it down like oh na na oh na na oh  
your na na got me feeling so good
