You bury the seed deep within  
Your heart  
Bury it beneath all your pain  
All your scars and misconceptions  
Has caused this seed to grow into your  
Hate tree

Your hate tree it stands so tall  
Overshadows your life, overshadows  
Your life  
Your hate tree

Now you've climbed to the top and  
Closed your eyes  
Trying to shut out and ignore reality  
Now you know you've got to get down  
But instead your choice is to hide among  
The branches of your hate tree

Your hate tree it stands so tall  
Overshadows your life, overshadows  
Your life  
Your hate tree  
Get off of your hate tree
