Hey are you ok? Better luck on another day this path
some weren't meant to follow. You're curious I can see
always looking behind those trees keeping one eye on
tomorrow. Yeah. Re engineer you're head is really what
the door mouse said push the lies away. If you take the
time to look for clues scrape the shit off you're shoes
you'll feel the real of today.

I'd love to take you there and see what I see on the
right side of my mind, on the right side of my mind. Hey
theres one more thing now these things arte hard to
explain for some it seems strange to swallow. The
frontiers of our mind is the last place we'll find, but
maybe the first place we should look. I'd love to take
you love totake you there and see what I see on the
right side of my mind. On the right side of my mind
keep one eye open the right side of my mind and I'll
see you there.
