"We Never Dream"

Visit "[We Never Dream](#)" on MotoLyrics.com

If this moment was mine I have lost it now completely
But you were there to see it all as well
Who is to take my place?
I think it everyday

In this moment in time I have found myself repeating
But you were there to steer away from hell
I recognize your face
I see it everyday

The world was only beautiful for so long
We tore the walls down
We reveal everything (everything)
[X2]

Give my body to them, I believe that they will free me
To never dream is all I desire
All of my breath away
All of my colors fade

The world was only beautiful for so long
We tore the walls down
We reveal everything (everything)
[X2]

I remember it vividly
Replacing the lifeless with living ones
I remember it vividly
Replacing the lifeless with living ones
You brought us all back,

How can I dream again?

How can I dream again?
How can I dream again?
The world is coming far too quickly
[X2]
