Anyone now under the mellow tree
Saturn in rain, sick of a woman me
Anyone now, all the one taste
Out in the desert, out in the sea for me

And now, I mean it
Over there the grains get in it
And who are you to think the ride
It would be easy,oh?

Anyone used to say understanding you
To set the day I'll kill time for two
But walking to the moon ain't cool when it's you
I can tell we were sadder happy every hour

Listen in vain you're so lost why
Move along please, I've got my charmed life
Oh I'm not in the way you say I am
Just talking because I'm lost today
All need caring all reasons staring
You're the ether reborn
And wander round the rest of your life
