Hold on girl, now don't be blue  
Dry those tears for me and you  
Can't you see our love is true?  
When you remember

To do just what you say you'll do  
Can't you see I live for you?  
And I need you to trust me too  
Open your eyes

So the sunshine lights in you  
Will light all your windows  
And change all your baby blues  
To golden sparks that light your eyes

When you finally realize  
That your fears were all just lies  
So open those eyes

And let the sunshine lights in you  
Light all your windows  
And take all your baby blues to gold
