

Quitter "Liberation Day"

Visit "[Liberation Day](#)" on MotoLyrics.com

from the shadows guards are watching towers to the
skies fences stretch for miles plan it slow work in
silence surmounting obstacles master patience leave
nothing to chance give the signal send the code
tomorrow is a go for liberation day keep a secret on
your tongue the operations on its liberation day use the
tricks of trade and barter gather up the keys open the
locks hell will freeze before we fail and only god will
know tonight's the night tonight we go tracking dogs
are at our heels and i will die before i kneel tonight's
the night tonight we go i know you're afraid of course
i'm afraid
