Different bodies, similar minds
Where will we go now, now we're alive?
Fasten your proteins, fatten your thighs
Different bodies, similar minds

Bob do it
Bob do it to me
Bob do it
Bob do it

Quantum mechanics, my only vice
Show me your raincloud, bring it inside
Make it eternal, make it exist
Different bodies, forever forever forever forever

Bob do it
Bob do it to me
Bob do it
Bob do it

Old stones collected in plastic bags on a bloody isle
Then placed in rows on the ocean floor
Your friends, polymers
[x6]

Pulling me down and then I'm dead then I'm gone
They are pulling me down and then I'm dead then I'm
gone
[x4]

Old stones collected in plastic bags on a bloody isle
Then placed in rows on the ocean floor
Your friend, polymers
[x2]

Your friend, polymers
Your friend
